

ASSIGNMENT #2: POV AND HMW

TEAM 4

OUTLINE

- Introduction
- Initial PoV
- Additional Needfindings
- PoVs
- HMWs
- Solutions
- Summary

INTRODUCTION

Fashing Chen

Che Wei Wang

Yu-Wei Chang

En-Huei Wu

Project domain: Social Interaction/ Collaboration

Project theme: Co-working/Scheduling toolkit

Target Audience: Those engaged in administrative process

INITIAL POV

LAST TIME, WE MET	Research Assistant
FOUND AMAZING THAT	<ol style="list-style-type: none">1. How complex the procedures are2. Lack of assistant tools
IT WOULD BE GAME CHANGING IF:	<p>There is a system that can simplify the procedure, e.g.</p> <ul style="list-style-type: none">- Dynamic status tracking (of file, of faculty...)- Workflow library for searching

WE INTERVIEWED ...

Four more people with experience on Administrative process

- Master Student at National Sun Yat-sen University
 - Research Assistant
 - Department Office Intern
- Master Student at Utrecht University
 - one-year administrative assistant at NTU
- Pharmacist at NTU Cancer Center
 - work more than three years
- Research Assistant at College of Law, NTU

REVISED PoVs:1

WE MET	Third interviewee, <ul style="list-style-type: none">- one-year experience being administrative assistant
FOUND AMAZING THAT	The cost of knowing the correct administrative procedure is high <ul style="list-style-type: none">- Offices don't share the same standard- Unclear instruction document
IT WOULD BE GAME CHANGING IF:	Everyone knows the up-to-date and identical procedure

REVISED PoVs:2

WE MET	First interviewee, <ul style="list-style-type: none">- Research Assistant- Department Office Part-time
FOUND AMAZING THAT	Going through the procedure in person is time consuming <ul style="list-style-type: none">- Officer busy / out of office
IT WOULD BE GAME CHANGING IF:	The applicants can know if the officer is available in advance.

REVISED PoVs: 3

WE MET	Fourth interviewee, <ul style="list-style-type: none">- Research Assistant
FOUND AMAZING THAT	The risk and uncertainty of delivering documents through mailroom. <ul style="list-style-type: none">- Documents sometimes disappear during the process- Officers forget about the document
IT WOULD BE GAME CHANGING IF:	We can track the location of the documents.

ADDITIONAL NEEDFINDINGS

- **Costy** to get process information
- **Inefficient** to check over offices stop by stop physically
- Convenient but **Risky** for mailroom

Need Insight

1. Easier to search for a procedure
2. Timely information synchronization
3. Security of the file transmission
4. Overall status check up

HMWs

POV1

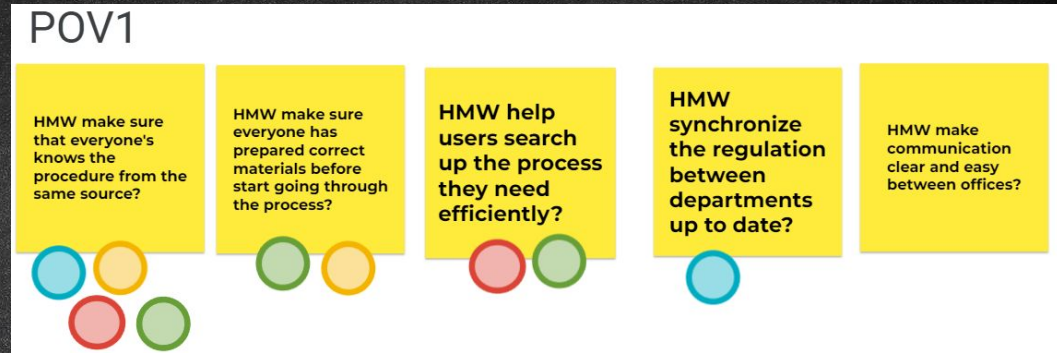

POV2

POV3

SELECTED HMW1

RELATED POV: The cost of knowing the correct administrative procedure is high due to various reasons

HMW: make sure that everyone knows the procedure from the same source ?

SELECTED HMW/2

POV2

HMW let the user know which officer is available now?

HMW reduce the number of urgent cases ?

HMW help the users design their schedule so they don't need to wait?

RELATED POV:

Going through the procedure in person is time consuming.

- Get stuck when officer busy / out of office.

HMW: let the user know which officer is available new ?

SELECTED HMW3

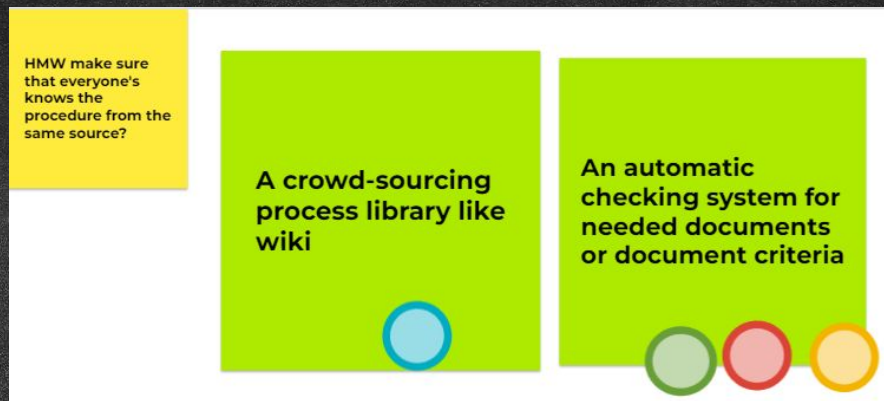

RELATED POV: The risk and uncertainty of delivering documents through mailroom.

HMW: make documents trackable ?

SOLUTIONS

SOLUTION1

RELATED HMW:

make sure that everyone knows the procedure from the **same source** ?

SOLUTION:

Build an automatic checking system

- check missing materials.
- check document criteria.

SOLUTION2

HMW let the user know which officer is available now?

**Busy-time
heat map
for every
officer**

**Officer status
board (e.g. 出
差、在辦公室、
忙碌、空閒)**

**public
schedules
of officers**

**A button that
can poke the
officers to
make sure if
they are at
seat**

RELATED HMW:

let the user know which officer is **available now** ?

SOLUTION:

Build a real-time officer status board .

- busy / available.
- in office / off office.

SOLUTION3

RELATED HMW:

make documents **trackable** ?

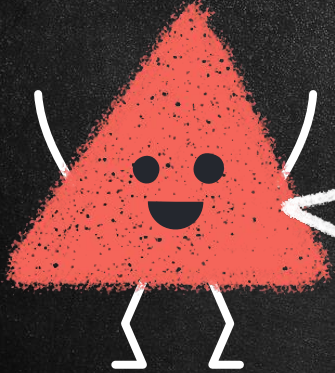

SOLUTION:

Build a real-time file status board .

- location / step.
- approved / not approved.

SUMMARY

- Current workflow is still primitive
 - e.g. phone call, mailroom
- Good communication can reduce a lot of administrative cost
 - Synchronized and unanimous standards
 - Save time passing down information
- Digitizing everything is the end goal
 - Prevent missing documents
 - Remove physical waiting time
 - Real-time status update

THANK YOU
FOR LISTENING
